To expand and strengthen our team answering to the ever-changing challenges of our software products, we are looking for a **Technical Lead for our Web-based product-line**. In this position, you will be part of the Applied Maths' development team at our office near Ghent, Belgium.

- Required
 - Affinity with technical-scientific software development
 - Good knowledge of JavaScript (ES6, HTML5, CSS3)
 - Knowledge of a JavaScript framework (React, Angular, Vue, ...)
 - Ability to technically coach other JavaScript developers
 - Ability to participate in code reviews
 - Team player
 - Familiar with version control systems and the typical software product development lifecycle
 - Be able to take a leading technical role and act as Product Owner in an Agile/SCRUM context
 - Fluent in English (both spoken and written)
- Preferable
 - Dutch speaking
 - Knowledge of GraphQL, Relay, Node.JS
 - Knowledge of microbiology / bio-informatics
- Plus
 - Experience with high-performance and cloud computing (AWS)

Please send your CV and motivation letter to: filip.claeys@biomerieux.com

Applied Maths is a dynamic, innovative and world leading bio-informatics software company in microbiology, acquired in 2016 by bioMérieux, and now an integral part of bioMérieux's Data Analytics Unit. Our flagship software brand BioNumerics® is a cornerstone databasing and analysis solution in many microbiology labs all over the world. The advent of novel lab technologies has yet again inspired the company to reinvent itself, starting to develop SaaS solutions for microbiology, maintaining a leading position in the field of bacterial typing and molecular surveillance.

A strong scientific and technological pioneering spirit is what drives bioMérieux development since its creation in 1963. We design innovative in vitro diagnostic solutions for our customers that initiate new forms of scientific partnerships to be at the forefront of the most advanced technologies. Our presence in

more than 150 countries with 9,400 employees worldwide secures bioMérieux commitment to public health. bioMérieux products are used to diagnose infectious diseases, they provide high medical value results for cancer screening and monitoring, cardiovascular emergencies and contamination to improve patient health and ensure consumer safety. Products also include industrial microbiological controls to detect microorganisms in food, pharmaceutical and cosmetic products.
