

A strong scientific and technological pioneering spirit drives **bioMérieux** development since its creation in 1963. We design innovative in vitro diagnostic solutions for our customers that initiate new forms of scientific partnerships to be at the forefront of the most advanced technologies. Our presence in more than 150 countries with 9,400 employees worldwide secures bioMérieux commitment to public health. bioMérieux products are used to e.g. diagnose infectious diseases, and also include industrial microbiological controls to detect microorganisms in food, pharmaceutical and cosmetic products.

Applied Maths is a dynamic, innovative and world leading **bio-informatics software company** in microbiology, acquired in 2016, and now integral part of the bioMérieux's Clinical Unit. Our flagship software brand **BioNumerics®** is a cornerstone databasing and analysis solution in many microbiology labs all over the world. The advent of novel lab technologies has yet again inspired the company to reinvent itself, developing now **SaaS solutions for microbiology**, maintaining a leading position in the field of bacterial typing and molecular surveillance.

To expand and strengthen our team answering to the ever-changing challenges of microbiology, we are looking for a **Product Specialist** with a scientific background and a commercial interest. In this position, you will be part of the Applied Maths' support team at our office near Ghent, Belgium. You will both be involved in sales support and after sales services.

You are:

- ✓ A dynamic and creative person
- ✓ A team player with an open-minded attitude
- ✓ A self-starter and a methodical self-motivated worker
- ✓ Eager to promote high-end software products
- ✓ Motivated to provide clients with excellent service

You will be:

- ✓ Maintaining contacts with scientists worldwide
- ✓ Promoting the use and features of our products
- ✓ Providing product support and following up on service contracts
- ✓ Gathering and distributing product-related information throughout the organization
- ✓ Assisting in the validation of our new software products
- ✓ Participating in project meetings and conferences both nationally and internationally
- ✓ Based in our headquarters near Ghent, Belgium

You have:

- ✓ A bachelor or master degree in Biology, Biotechnology, Bio-Chemistry, Bio-Engineering or related fields
- ✓ An interest in bioinformatics, applied to microbial data analysis
- ✓ Preferably 1-3 year experience in scientific research and bio-data analysis. Preferably experience with NGS data analysis pipelines
- ✓ Knowledge of BioNumerics is not required, but considered as a plus
- ✓ An interest in cooperating actively with others e.g. for demo sessions or customer training
- ✓ Strong communication skills with the ability to present information in verbal, written or visual form to a variety of audiences
- ✓ A fluency in English (written and spoken)
- ✓ At least a basic knowledge of Dutch

We offer you:

- ✓ Full time job position
- ✓ Flexible working hours and a beautiful working place situated in the green countryside
- ✓ A chance to travel around the world and attend international scientific conferences
- ✓ Good connections with public transport
- ✓ Attractive remuneration scheme with a personalized content
- ✓ Front row seat in the challenging sector of bioinformatics
- ✓ The dynamics of a small company, but part of the bioMérieux group, with an openness to the whole of the globe serving clients in over 100 countries
- ✓ Lots of freedom to organize your work and match it to your private life and interests

Join us to take on a new challenge!
